Safety contribution charge 2016

Denmark/Faroe Islands

The safety contribution charge will be reduced to 6.00 DKK.

The safety contribution charge will be reduced from 6.25 DKK to 6.00 DKK per passenger in 2016.

Air carriers are subject to the safety contribution charge when departing from a Danish airport the use of which is open to the public. The safety contribution is charged for every passenger travelling, except for passengers below the age of 2, transit and transfer passengers and airline staff on duty

The charge is applicable for transport with an aircraft approved for more than 10 passenger seats or has a maximum takeoff weight of more than 5700 kg.

The safety contribution charge was implemented in 2013, and is regulated in BL 9-10. The Danish Transport and Construction Agency has issued an amending Regulation to BL 9-10, in which the safety contribution has been reduced. The Regulation will take effect on 1 January 2016.

There have been no comments to the amendment. Read more about the safety contribution in § 148 in the Law on civil aviation, which you may find in the column to the right.
